(Course 12000 Full After Action Report)

1. Given the unique nature of Maritime Interdiction Operations (MIO) and the fact that maritime and other forces are facing an increasing threat from individuals and groups employing asymmetric tactics to overcome superior military capability, countering these threats is of significant importance. Within the Countering Improvised Explosive Devices in the Maritime Environment (CME) programme of work, NATO has identified a need for boarding teams and operating forces to be trained so as to enhance personnel and units' readiness prior to deployment in MIO. Therefore, considering the successful iteration of the course in Mar 2017 IAW ref C, NMIOTC will run the second iteration for 2017 of the Course 12000 that covers MIO in a C-IED Maritime Environment.

2. The IED threat is an issue that has been continuously considered by the NATO community collectively as well as by individual Nations in maritime operations. The IED will undoubtedly continue to feature as a weapon of choice against NATO forces. Recent / current operations have clearly illustrated the types of situation at sea and in port where concepts of force protection (as force preparedness and capability), are being challenged. Countering such threats in the maritime environment is of equal to land importance.

3. NMIOTC has developed this Course aiming to fulfil an operational gap in capability and most importantly to contribute to counter-threat operations conducted by boarding teams when searching for, securing, exploiting evidence and gathering materials for analysis, which are fundamental to the counter-threat process. In mounting C-IED operations in the maritime environment the tactical skills are largely vested on boarding teams, where expedient interpretation of doctrine to meet environmental conditions is paramount to mission success. This course provides the skills and knowledge necessary to understand the concept of CME and practically exploit a site of interest by gathering data and evidence that can be used to influence own TTPs, understand enemy TTPs and contribute at the higher exploitation levels to counter-threat processes.

4. **Aim:** To educate and train international boarding team personnel in NATO TTPs to undertake expedient weapons intelligence tasks on board vessels and other maritime infrastructure in support of C-IED operations. On completion of the Course students will be able to:

a. Provide IED threat awareness and search principles that support the Attacking the Network (AtN), C-IED main line of effort;

b. Apply pre-boarding requirements (key considerations for conducting vessel search, tactical considerations, required resources and on-board actions);

c. Apply Knowledge / skills / techniques in support of C-IED in the Maritime Environment (CME) (On-Board Site Exploitation, perform evidence / biometrics collection, vessel and people search) through mentored exercises, a Table Top Exercise (TTX) and a Final Tactical C-IED Exercise (FTX);

5. The **target audience** includes naval and other maritime personnel functioning as Boarding Officers (BOs), Officers and Petty Officers, Force Protection Coordination Officers (FPCOs) responsible for their ship / task group, or involved in MIO. Additionally, the Course is open to Command Team members (CO, XO, OPS, COMMS etc.) and Boarding Team members or equivalent civilian personnel who are involved in Maritime Security and MIO, potentially related with C-IED in the Maritime Environment. Personnel from governmental Agencies (Coast Guard, Maritime Police, Civil Guard, etc.), educational and training facilities and equivalent civilian personnel who are involved in Maritime Security and MIO, potentially related with C-IEDs are also eligible to participate.

6. The Course will be conducted in English. Attendees should have the following standards of proficiency in English (as described / coded in STANAG 6001), Listening – Good (3), Speaking – Fair (2), Reading – Good (3) and Writing – Fair (2).

7. This is a NATO ACT Approved course iaw ref B, marked as “NATO Unclassified/Releasable to PfP (except Russia)/MD/ICI/PatG” releasable also to ISAF Troop Contributing Nations (TCNs), that have expressed a keen interest in the subject matter. NMIOTC applies security arrangements and regulations according to NATO standards.

8. A draft agenda for this event is hereby attached as Enclosure 1. The final agenda will be included with the Joining Instructions in due time. Attendance of the participants is obligatory in order to be considered as “successful attendees”. Participants, who fail to attend at least 85% of the Course, are not entitled to acquire the graduation certificate.

9. The Course will start on **Monday, 23 Oct and will end on Friday, 27 Oct 2017**, training schedule will run from 08:30 to 15:30. Due to the fact that the Course will be run with the cooperation of private sector, the execution of the Course is subject to the achievement of a minimum number of participation.
