3 June 2019

Trial Demonstration for the project “Biometrics in support of naval operations to fight piracy and terrorism”

NMIOTC, the Institute of Biostructures and Bioimaging (IBB) of the National Research Council of Italy (CNR) and the NATO Communication and Information Agency (NCIA) co-organized the trial demonstration for the project “Biometrics in support of naval operations to fight piracy and terrorism” from 20 to 24 May 2019, under the supervision of the NATO IS/ESC Division.

The event aimed at demonstrating and assessing technical and operational interoperability in the biometrics and Joint Intelligence, Surveillance and Reconnaissance (JISR) Domain in the maritime environment and was supported by various multinational military agencies and private companies.
