

News Release: 47/2024

24 July 2024

Course 28000 – “Radiological Search in Maritime Environment”

From 15th to 19th of July 2024, the Resident Course 28000 “Radiological Search in Maritime Environment” was conducted at the NMIOTC premises, utilizing wide range of the Centre’s training facilities. The course is one of the pillars of Office of Nuclear Incident Policy and Cooperation (NIPC) and NATO training effort in Europe.

Twenty-six (26) participants and twelve (12) Subject Matter Experts (SME) from six (6) NATO countries [The Czech Republic (7), Great Britain (2), Greece (5), Italy (2), Netherlands (2), and USA (8+12)] took part in the course. The U.S. Department of Energy and Defense Threat Reduction Agency supported the course with SMEs, equipment and ‘know-how’.
