

News Release: 90/2024

19 December 2024

Exercise AEOLUS 2024

From 9th to 13th of December 2024, NMIOTC hosted “AEOLUS 2024”, a CBRN crisis management exercise aiming to fill the gap between field and warning & reporting exercises, as well as prepare CBRN C2 liaison officers, CBRN first response managers and CBRN JAT members to practice crisis situation management, involving both military and civilian aspects.

In total, 111 participants from 16 NATO and Partner nations were trained on the management of realistic CBRN scenarios, focused on the whole range of events and interactions between both military and civilian impacts. To further educate trainees on cross-effects and relief, and developing their abilities to translate their CBRN skills and knowledge in operational options for non-specialised commanders, this first edition also included basic intelligence and media considerations.
